

# How to compensate for social and environmental reproduction?

---

-Two dilemmas, one common solution-

Nina Sostaric  
UBI and Degrowth Conference  
Hamburg, May 2016

# Our world

## What we measure:

- Wealth
- Employment
- Poverty
- Economic growth
- 1%

## The reality:

- Economic insecurity
- Precarious conditions
- Overall temporality
- Rat-race lifestyle
- 99%

# Consumerist society

# Social reproduction

- Care economy needs both recognition and redistribution
- Work sharing between men and women including:
  - Paid and unpaid work
  - Visible and invisible work
  - Emotional burdens
- Non-monetary relationships are build on:
  - Reciprocity
  - Recognition

Localisation

Globalisation

# Environmental reproduction

- Unlimited growth is impossible on a limited planet
- Generational justice requires putting people and nature before profit
- Introduction of taxes on consumption
- Clearing the ecological space in the Global North
- Changing the consumerist norms and values
- Deep-seated intersection between inequality and climate change

**CAPITALISM**

**INEQUALITY**

**GROWTH**

Redistribution of wealth

Taxes on consumption & advertising

UBI in local currency

Lower environmental footprint

**CARE ECONOMY**

**Thank you for your  
attention!**
